You’re looking at a single nanoparticle of the Oxford AstraZeneca vaccine
One million times its actual size, sculpted in glass

This stunning sculpture celebrates the remarkable story of the Oxford University researchers and their achievements in helping stop the spread of COVID-19.

We’re all living this history in the making. Come and see the vaccine up close – and share your thoughts with us.

Wireless World
Marconi’s ingenious inventions gave birth to a revolution: wireless technology. Discover how microwaves and modern broadcasting transformed our world.

Einstein’s blackboard
In 1931 Einstein visited Oxford and used this very blackboard to explain the age and size of the universe in his lecture. A must-see glimpse into the mind of a genius.

The beauty of science captured in art
Experience a single nanoparticle of the Oxford AstraZeneca vaccine, one million times its actual size, sculpted in glass. A stunning celebration of Oxford University researchers’ remarkable achievements which are helping stop the spread of COVID-19.

Come and add your voice to this living archive of history in the making.

Talking to angels
This marble slab is an early copy of a wooden tablet made by John Dee in 1582. He used it to help explore the natural world by talking with angels.

Making time
Before clocks and smartphones, we told the time using devices and dials to read the rhythm of the universe. Take a time trail through our founder’s fascinating collection.

Model Universe for a Wizard Earl
Enter the Top Gallery and you can’t miss our model universe: the Armillary sphere—a stylish astronomical instrument with a tale to tell. Discover its gifted owner, the Wizard Earl, suspect in England’s most notorious treason — the 1605 Gunpowder plot.

Fit for a Queen
Pick up an astrolabe and you hold the universe in your hand. Using the position of the sun and stars in our moving universe, astrolabes tell the time, do maths — even predict the future. This one was made in 1559 for Queen Elizabeth I.

A remarkable building
You’re standing in the world’s first purpose-built public museum, completed in 1683 to display the Ashmolean collection. We opened here in 1924 as the History of Science Museum.

Shop
From astrolabes and activity packs to eco-friendly mugs and periodic table goodies — take away a souvenir of your visit.

The periodic table
Discover Henry Moseley’s pioneering new approach to ordering the periodic table — and how we still use it today.
